Artificial Intelligence (AI)

AGENDA

The Agenda of this presentation is:

- Clustering
- Types of Clustering
- Implementation of K-Means (Practical)
- Implementation of Hierarchical clustering (Practical)

Clustering

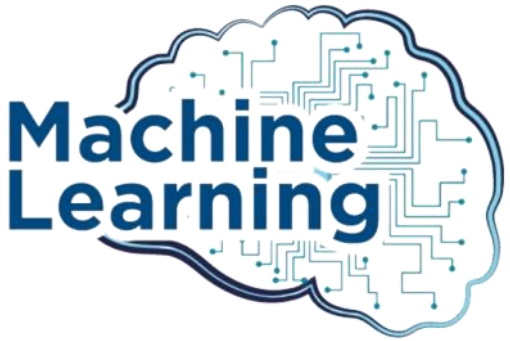

Back to main

Types of Clustering

- **K-Means Clustering**
- Automatically divides the data into different clusters of similar items.
- Require k parameter to make clusters

- **DBSCAN Clustering**
- Given a set of points in some space.
- It groups together points that are closely packed to each other.

- **Hierarchical Clustering**
- Does not require k parameter to make clusters.
- Tree-like structure is built that contain all possible clusters.
